AuroRa ®

Lighting Control Made Simple™

**Press a button—
create a safe path of light to,
through, and around your home**

⁂LUTRON ®

Lutron controls your light.™

easy to use

Control lights from each dimmer for individual room control, or adjust multiple lights at the touch of a button using the wireless controller or tabletop master control.

Suggested dimmer locations:

1. front entry
2. garage exterior
3. hall/foyer
4. kitchen
5. family room

saves energy

Dimming your lights saves electricity and extends the life of your light bulbs.
As an example, if you dim your lights 50%, you can save 40% on electricity and extend the life of your light bulbs up to 20 times.

4 kitchen

2 garage

3 foyer

5 family room

1 front entry

Discover the benefits of AuroRa lighting control. Simple to install... Easy to operate... Pre-programmed to work right out of the box.

- AuroRa dimmers install as quickly as light switches
- One simple package controls 5 areas of light
- Press a button to create a safe path of light into, and throughout your home
- Lutron's patented wireless RF technology ensures reliable communication between system components

System requirements:
- 600W incandescent/halogen loads
- 120VAC, 60Hz

simple to install

The AuroRa® system installs as quickly and easily as five light switches. Your system comes complete, ready to use, no programming required.

Simply replace switches with AuroRa dimmers, then, for remote control of your lights, plug in the tabletop master control and clip the wireless controller to the car visor.

The central antenna ensures reliable RF communication between all system components. It can be plugged into a standard wall outlet and placed discreetly in a closet or under a bed.

Experience the safety, simplicity and comfort of AuroRa® wireless lighting control
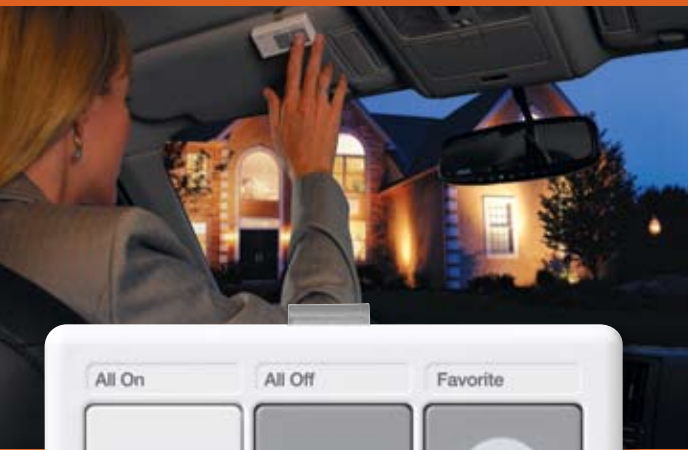

Wireless Controller**

safety

light your way home

Navigate safely from your car into and throughout your home with AuroRa's wireless controller. Whether you are leaving for the evening, or returning home at night, AuroRa gives you remote control of your lights from outside the home.*

All On - turns all dimmers on to 100% brightness

All Off - turns all dimmers off

Favorite - turns all dimmers on to their current slider levels
