RadioRA® | Chronos™ network package

Use a number of popular devices to control your lighting (PC, PDA, tablet, touch-screen).

Or, get the same control from remote locations – via any web browser.

The RadioRA Chronos™ Network Package allows you to control lighting throughout your home – via any web browser – while utilizing an existing home network.

Additional Package Benefits

- Enjoy a worry-free holiday with away mode programming that gives your home a lived-in look

- Feel secure at night with complete bedside control of your light. All at the touch of a button

- Light up your home from the safety of your car

- Enter your home and adjust the lighting with your master control

- Reduce wall clutter by replacing multiple switches on the wall with a single master control

- Security/Flash Mode feature makes your home fully visible in an emergency. Exterior lighting "flashes," while interior lighting goes to full bright

How RadioRA works

RadioRA uses radio-frequency signals to communicate between dimmers and controls. Each system has a unique digital code to ensure the reliability of your system.

RadioRA packages offer turnkey lighting control solutions.The system installs easily with no rewiring, and can be easily expanded at any time.
